Subject: Microsoft Settlement

Firstly, I do not believe that Microsoft would have ever lost if the trial had been conducted by a truly impartial judge or by a jury. However, given what the current state of the case is, I believe that the proposed settlement by Microsoft and the DOJ is acceptable. Of course, I think that the states that have decided to go out on their own case is absolute folly and they should be strongly encouraged by the DOJ to drop their suits and let Microsoft get on with competing in the markets in which they choose to participate.

I know that Clinton's pursuit of Microsoft has caused me great personal losses in my Microsoft and related investments for which I will never forgive him. This stalling economy needs closure to this ridiculous case and let the high-tech sector get on with the business of making products that satisfy consumer and business needs. It's time for everyone to move on from the nightmare of the Clinton Administration which includes the pathetic pursuit of one of America's truly great enterprises (Microsoft).

Thanks very much for taking the time to consider input from public.
